Languages

- French: native
- English: intermediate (B1 level)
- Spanish: elementary (A2 level)

Soft Skills

- Adaptability and flexibility
- Strong verbal communication
- Initiative and curiosity
- Problem-solving in technical contexts
- Time management and autonomy

IT Skills

- Windows and Linux
- Office suites and equivalents
- Software: KiCad, SEE Electrical, TIA Portal, Galileo

Interests & Hobbies

- Guitar: Self-taught for over 3 years, exploring various genres independently
- Fitness: Ongoing personal training, focused on discipline and improvement
- Travel: Have lived in Dijon, Réunion Island, and Nantes; traveled across Europe, gaining cultural awareness and adaptability

References

- Julien Lefort – Automation Engineer, ARMOR GROUP, Nantes, France
- Antoine Goullet – Tutor, Institut Universitaire de Technologie, Nantes, France

Education

2023 - Present (2nd year)

Institut Universitaire de Technologie, Nantes, France
Bachelor Universitaire de Technologie en Génie Électrique et Informatique Industrielle
Equivalent to a Bachelor's degree in Electrical Engineering & Computing
Main subjects : electronics, automation, IT, mathematics, physics, electricity, english..

2021 - 2023

Lycée Pierre Poivre, St-Joseph, La Réunion (French overseas region)
Baccalauréat STI2D – Sciences et Technologies de l'Industrie et du Développement Durable
Equivalent to a High School Diploma with a focus on Industrial Science and Sustainable Development
Main subjects: industrial engineering, physics, mathematics, digital systems, mechanical design, environmental science

Work Experience & Projects

Sept. 2024 – Present

Work-Study Automation Technician – ARMOR GROUP, Nantes, France
Tasks consist in designing electrical schematics and programming PLCs (LADDER, GRAFCET) and creating HMIs for industrial automation systems.
Skills :

- Electrical diagram reading and creation
- Fault analysis and diagnostics
- PLC programming
- IT skills: office software, Windows environment

Feb. 2023 – July 2024

Academic Projects – BUT GEII (Semesters 1 & 2) – IUT de Nantes
Developed embedded systems for two educational projects: a competition robot and an automated train barrier. Tasks included designing PCBs, integrating sensors, and writing real-time code using microcontrollers.
Skills:

- PCB design and routing
- Programming C / C++
- Electronics soldering and functional testing

Personal Projects

Head Tracker – Designed a head-tracking system for gaming
Custom PC Build – Built and configured a computer setup
